

# Christopher J. Miles

<http://www.chrisjohnmiles.com/>

Physicist and applied mathematician

Email : [chris.john.miles@gmail.com](mailto:chris.john.miles@gmail.com)

## EDUCATION

---

- **Massachusetts Institute of Technology** Cambridge, MA  
*Batchelor of Science in Physics with a minor in Mechanical Engineering* Sept. 2006 – June. 2010
  - **University of Michigan** Ann Arbor, MI  
*Masters of Science in Applied and Interdisciplinary Mathematics* Sept. 2012 – Dec 2014
  - **University of Michigan** Ann Arbor, MI  
*Ph.D. in Physics* Sept. 2012 – May 2018  
Advisor: Prof. Charles R. Doering
- Highlighted Graduate Coursework:*
- *Physics:* Quantum Field Theory, Quantum Mechanics, Electromagnetism, Statistical Mechanics, Complex Adaptive Systems, Fractals and Percolation
  - *Scientific computing:* Machine Learning, Computer Modeling in Complex Systems, Numerical Methods for Differential Equations, Numerical Linear Algebra
  - *Applied mathematics:* Mathematical Fluid Mechanics, Stochastic Processes, Dynamical Systems and Chaos, Measure Theory, Functional Analysis, Complex Analysis, Asymptotic Analysis
- **Udacity: Deep Reinforcement Learning Nanodegree** July 2018 — Present

## ACADEMIC RESEARCH EXPERIENCE

---

- **University of Michigan: Nucleation in acoustic droplet vaporization** Ann Arbor, MI  
*Graduate Student Research Assistant* Spring 2013-July 2016
  - Investigated the physics of acoustic droplet vaporization (the vaporization of micron-sized droplets by ultrasound) to inform the optimization of this mechanism in its potential chemotherapy applications.
  - Constructed a theoretical model of the acoustic wave-droplet fluid dynamic interaction with the addition of classical nucleation theory to predict a nucleation event.
  - Conducted experiments of ultrasound pulses on a bed of droplets to verify the theoretical prediction of the ultrasonic nucleation pressure threshold.
  - For more information, see article: [C. J. Miles, C. R. Doering, O. D. Kripfgans, Nucleation pressure threshold in acoustic droplet vaporization, Journal of Applied Physics 120, 034903, 2016](#)
- **Woods Hole Oceanographic Institution: Invasion of active matter into a fluid** Woods Hole, MA  
*Research Fellow* Summer 2016
  - Conducted research on an active matter system in collaboration with Prof. Michael Shelley (NYU), Art Evans (UW-Madison), and Prof. Saverio Spagnolie (UW-Madison).
  - Modeled the collective motion of many swimming bacteria in a continuum model governed by the Smoluchowski equation.
  - Analytically and numerically investigated the nonlinear dynamics of this model under various bacterial configurations.
  - For more information, see pre-print article: [C. J. Miles, Arthur A. Evans, Michael J. Shelley, and Saverio E. Spagnolie, Active matter invasion of a viscous fluid and a no-flow theorem arXiv:1803.05543\[cond-mat.soft\] \(submitted\)](#)
- **University of Michigan: Optimal control of fluid mixing (PhD Thesis)** Ann Arbor, MI  
*Graduate Student Research Assistant* Spring 2013 – Present

- Computationally and analytically studied a series of optimization problems on fluid mixing.
- Discovered that diffusion can limit the mixing effectiveness of incompressible flows in some cases.
- For more information, see articles:
  - \* **C. J. Miles, C. R. Doering, A shell model for optimal mixing, Journal of Nonlinear Science, 2017**
  - \* **C. J. Miles, C. R. Doering, Diffusion-limited mixing by incompressible flows, Nonlinearity, 31, 5, 2018**

---

## DATA SCIENCE AND MACHINE LEARNING EXPERIENCE

- **Santa Fe Institute's Complexity Challenge** September 2017  
*Participant*
  - I implemented Q-learning in a multi-agent system where many agents are attempting to move across a board mimicking transportation problems.
  - Link: [http://www.chrisjohnmiles.com/personal\\_projects/sficc](http://www.chrisjohnmiles.com/personal_projects/sficc)
- **Michigan Datathon hosted by Citadel and Correlation One** Ann Arbor, MI  
November 2017  
*Participant*
  - Chosen to participate based on selective assessment test.
  - Competed with a four-person team against 22 other teams in an intensive seven-hour competition.

---

## UNIVERSITY SERVICE

- **Complex Systems Advanced Academic Workshop** Ann Arbor, MI  
2015-2017  
*Co-organizer*
  - Organize biweekly meetings for graduate student talks, journal discussions, and tutorials
  - Organized Introduction to Agent-Based Modeling short course taught by Bill Rand (July 2015)
  - Organized Complex Systems Research Hackathon (September 2016)
  - Organized Evolutionary Game Theory short course taught by Carl Simon, Charles Doering, and Christoph Adami (July 2017)
- **Introduction to Mechanics: Lab. Course** Ann Arbor, MI  
Fall 2013-Fall 2014  
*Graduate Student Instructor*
- **Electromagnetism II** Ann Arbor, MI  
Spring 2015  
*Graduate Student Assistant*
- **Evolutionary Game Theory** Ann Arbor, MI  
Fall 2016  
*Graduate Student Assistant*
- **Electromagnetism (Honors)** Ann Arbor, MI  
Winter 2017  
*Graduate Student Assistant*
- **Theory of Complex Systems** Ann Arbor, MI  
Fall 2017  
*Graduate Student Assistant*
- **Nonlinear Dynamics and Chaos** Ann Arbor, MI  
Fall 2017  
*Graduate Student Assistant*
- **Evolutionary Game Theory** Ann Arbor, MI  
Winter 2018  
*Graduate Student Assistant*
- **Agent-based modeling in complex systems** Ann Arbor, MI  
Winter 2018  
*Graduate Student Assistant*

---

## AWARDS AND FELLOWSHIPS

- National Undergraduate Fellowship in Plasma Science and Fusion Technology Summer 2009
- University of Michigan's Rackham Merit Fellowship June 2012-Present
- Woods Hole Oceanographic Institute's Geophysical Fluid Dynamics Fellowship Summer 2016

## COMPUTER AND PROGRAMMING SKILLS

---

- **Programming:** Experience in Python and Matlab.
- **Version control:** Experience with Git, Mecerual, Github, and Bitbucket.

## WORKSHOPS AND CONFERENCES

---

- Control theory short course Minneapolis, MN, June 2014
- Turbulent transport and mixing workshop - IPAM, UCLA Los Angeles, CA, October 2014
- APS Meeting Division of Fluid Dynamics Boston, MA, November 2015
- Extreme events and criticality in fluid mechanics Toronto, ON, January 2016
- Challenges in non-equilibrium statistical physics and fluid dynamics Provo, UT, May 2016
- Genetic programming: theory and practice Ann Arbor, MI, May 2016
- APS Meeting Division of Fluid Dynamics Portland, OR, November 2016
- Turbulent dissipation, mixing, and predictability workshop Los Angeles, CA, January 2017
- Santa Fe Institute's Complex Systems Summer School Santa Fe, NM, June 2017
- APS Meeting Division of Fluid Dynamics Denver, CO, November 2017
- Dynamics Days 2018 Denver, CO, January 2018
- Fundamental Problems in Active Matter Aspen, CO, January 2018

## PRESENTATIONS

---

- Optimal fluid mixing Ann Arbor, MI, 2014
- Optimization tutorial and fluid mixing Ann Arbor, MI, 2015
- A shell model for optimal fluid mixing Ann Arbor, MI, 2015
- Optimal control of a shell model for mixing Boston, MA, 2015
- A shell model for optimal fluid mixing Ann Arbor, MI, 2015
- Clusters, confinement, and collisions in active soft matter Ann Arbor, MI, 2016
- Nucleation pressure threshold in acoustic droplet vaporization Portland, OR, November 2016
- Unstable self-stretching and stealth invasion of active matter into a fluid Denver, CO, November 2017
